

I have chosen satellite radio of standard FM or AM, for the following reasons.

1. I do not have to listen commercials that I do not want to hear.

2. I can choose the type of music or talk or whatever I want to listen to and not the music that some company like Clear Channel thinks I want to hear.

I was so tired of hearing the same type of songs and play list wether I was in Augusta, Columbia or Savannah. The big radio station owners have taken the choice out of radio, and satellite radio has give this back to us.

3. I think that this should be a freedom that satellite radio should have, if they can broadcast local traffic or weather, or whatever they should have the freedom to do so.
